DATOS ADICIONALES

Course

- Artificial Intelligence Specialist
- HTML, CSS, JavaScript, Python, SQL,
- Linux, Docker Course
- Robotics Course – Arduino Cisco
- Networking Academy Course
- Cybersecurity Playbooks Course
- Cybersecurity in Teleworking
- Machine Learning Crash Course
- Elements of AI Course
- Azure Fundamentals Course
- AWS Course
- Wordpress Course
- English Courses and Institution
- CPR Course

NICOLAS FRANCE

Technical Specialist in Infrastructure Artificial Intelligence Specialist

I am a student of the Information Systems Engineering career, passionate about technology. I found my vocation in programming and I was able to exercise it as a profession working as a Technical Specialist in Infrastructure and Specialist in Artificial Intelligence in Algeiba, where I develop my leadership and teamwork skills.

Skills

Languages and Frameworks

- Python development: data structures, functions, classes, handling libraries such as pandas, numpy, requests, httpx for data analysis and API consumption.
- API and web application development with Flask and FastAPI.
- Knowledge of JavaScript: DOM manipulation, asynchrony, and events; use of Node.js, Express.js, and React.js for frontend and backend projects.

Artificial Intelligence and Chatbots

- Design and implementation of virtual assistants and chatbots with API integration (WhatsApp, Microsoft Teams, Google Play Console).
- Natural language processing and speech recognition in Python.
- Integration of AI models for opening applications, executing commands, and automating tasks in local environments.

Databases

- Management and queries in PostgreSQL, Oracle DB, and SQL Server.
- Data integration and ETL with Pentaho Data Integration.

DevOps and Automation

- Use of Docker for application deployment and maintenance.
- Creation of automation flows with GitHub and PowerShell.
- Version control with Git and management of virtual environments with venv.
- Experience in Scrum environments.

Testing and Quality

- Test automation.
- Documentation of processes and APIs for development teams.

Featured Personal Projects

- **Notable personal project:** Lead development of the Dani system, integrating multiple automations, voice control, and productivity tools, consolidating all the technological capabilities developed in previous projects.
- **AI-integrated assistant:** to improve interaction and automation of tasks on the computer.
- **Web and application development:** Creation of websites with WordPress and pure code, using own domains and hosting on GitHub. Implementation of advanced features, SEO optimization, and responsive design. Development in progress of proprietary applications with map integration called HolyFind/HolyMap.
- **Server automation and administration:** Development of an automation system for mass server reboots, with graphical verification and timer. Performing multiple file modifications and conversions from AAB to APK compilations.
- **Technology integration and bot projects:** Creation of "RUH" (Unified Patient Receiver) and the SiSaludBOT project, including integration of artificial intelligence and automatic notifications. Development of a bot that processes email information and sends alerts via WhatsApp with attachments. (LinkedIn evidence)
- **Renovation of the hospital system login page for Córdoba Hospitals** (LinkedIn evidence).

EDUCATION

National Technological University

- Cordoba Regional Campus

- Information Systems Engineering.
• (evening shift)

Participatory talks

- Cybersecurity Talks: Cybersecurity Skills Cube
- Application Monitoring Talks: Zabbix Functionality and Utility
